Methodology (FAI Sporting Code §8.5)

- §8.5.3 Competitor's Team Cup Score = own day score – class winner's day score + 1000, for each pilot with a valid launch in a class that had a valid competition day.
- §8.5.4(a) Team's Daily Score = mean of its competitors' Team Cup Scores across all classes that flew that day (2 dp). Pilots without a valid launch are excluded.
- §8.5.5 Team Cup Score = (sum of Team's Daily Scores) ÷ (days the team scored), to 2 dp.
- §8.5.6 Gold / Silver / Bronze awarded to the three highest Team Cup Scores.

Eligibility & edge cases

- §8.5.2 (2-class minimum): Excluded as ineligible — ARG, RSA (one class only) and ESP, EST, JAP, NOR, SLO, SWE, USA (18 Metre only). 16 teams qualified.
- §8.5.4(b) zero-score backfill: never triggered — every eligible team had a valid launch in ≥2 classes on all 10 days.
- Non-launchers (given no score): 18 Metre day 10 (4 pilots); Open days 3 & 4 (1 each).

- No not_competing entries appeared in the scored results.

Standings reflect the currently published official scores. If any day is later rescored, re-running `compute_teamcup.py` will update these figures.
